

VIVAAN SANDEEP OJHA

Mumbai, India | [+918097690289](tel:+918097690289) | vivaanojha33@gmail.com | [LinkedIn](#) | [GitHub](#) | Immediate Joiner

PROFESSIONAL SUMMARY

Senior Software Engineer with 7+ years of experience designing and developing scalable, secure, and high-performance full-stack applications across Insurance, Banking, and Pharmaceutical domains. Proficient in Node.js, TypeScript, React.js, React Native, Express.js, NestJS, and microservices architecture, with expertise in REST API development, enterprise integrations, and distributed systems. Experienced in building cloud-native solutions on AWS and Azure, implementing secure authentication, encryption, messaging, and containerized deployments. Passionate about delivering production-grade applications with a strong focus on performance, scalability, reliability, and clean architecture in Agile environments.

TECHNICAL SKILLS

- Frontend: HTML5, CSS3, React.js, Redux, Hooks, Axios, Bootstrap, SAAS.
 - Backend: Node.js, Express.js, Nest, Microservices, Next, REST APIs, Middleware, JWT Auth
 - Databases: MongoDB, Mongoose, PostgreSQL, Redis, Big Query, Aggregation Framework, TypeORM
 - Cloud & DevOps: AWS (EC2, ECS, S3, Lambda, CloudWatch), Serverless, CI/CD Pipeline
 - Security & Integration: AES-256 Encryption, GCP KMS, API Security, Token-based Auth, Apigee
 - Tools: Git, Postman, Firebase, Prometheus, AppDynamics, Pug, ESLint, Prettier, Husky, Multer
 - Languages: JavaScript (ES6+), TypeScript, Python
-

PROFESSIONAL EXPERIENCE

Senior Software Engineer, NeoSOFT Technologies | Client: Ageas Federal | **May 2026 – Present**

Project: ACE (OTG Next) is an enterprise cross-platform insurance sales platform enabling lead management, Financial Needs Analysis, policy onboarding, underwriting, premium collection, doc management, and servicing across Android, iOS, and Web through Azure-based microservices.

- Led full-stack development of **ACE (OTG Next)**, delivering end-to-end insurance workflows across Android, iOS, and Web using a shared React Native codebase.
 - Designed and maintained **Node.js + TypeScript microservices** for Core, Opportunity, New Business, and Payment domains using Express.js, TypeORM, PostgreSQL, and Redis.
 - Implemented secure authentication using **Azure Active Directory (MSAL)**, JWT, refresh token handling, silent authentication, and role-based authorization.
 - Integrated enterprise services through **APIM**, including payment gateways, underwriting systems, eKYC, OCR, CRM, reporting, and document management services.
 - Developed secure document workflows using **Azure Blob Storage**, SAS URLs, PDF generation, upload/download services, and policy document management.
 - Built reusable **React Native** modules using Redux Toolkit, Redux Saga, Formik, and Yup, delivering cross-platform business workflows across mobile and web.
 - Delivered business-critical insurance workflows including **ACR/SCR, OTP-based e-sign verification, Spark reports, biometric authentication, payment processing, and application tracking**; automated background jobs using **Cron Jobs on AKS (Kubernetes)** with **Helm**, enhancing production reliability through **Docker, Swagger/OpenAPI, Application Insights**, and **CI/CD automation**.
-

Senior Software Engineer, NeoSOFT Technologies | Client: HDFC Life | **May 2025 – May 2026**

Project: InstaPRL is HDFC Life's digital agent recruitment and onboarding platform supporting PRL, Digital FC, PoSP, and PTE journeys. It manages the complete onboarding lifecycle including candidate registration, scoring, examination, payments, appointment kit generation, and operational reporting through secure backend services and third-party integrations.

- Built and optimized **secure REST APIs** using **Node.js, Express.js, MongoDB, and PostgreSQL**, implementing reusable middleware, request validation, centralized error handling, and structured logging.

- Implemented **AES-256 encryption** with **GCP KMS** for secure data exchange and integrated enterprise services including **CIBIL**, **Sinch SMS**, **Apigee API Gateway**, **Payment Gateway**, and **HMS** for credit verification, customer communication, and financial workflows.
- Architected and developed a **Non-CIBIL Scoring Engine** using weighted algorithms and **MongoDB Aggregation Pipelines** for real-time customer eligibility and risk assessment.
- Designed **event-driven microservices** using **AWS SNS/SQS** with retry mechanisms and **Dead Letter Queues (DLQ)**, and developed **AWS Lambda** scheduled jobs for MongoDB-to-PostgreSQL synchronization, automated reporting, and background processing.
- Engineered **RBAC-based authentication** using **JWT access/refresh tokens**, implemented secure **AWS S3 pre-signed URL** based document upload, validation, storage, and retrieval using **multer-s3** and **Sharp**.
- Built **React.js admin dashboards** using **Redux**, **Material-UI**, **React Router**, **Context API**, and **Axios** for fee waiver management, IFSC administration, candidate onboarding, and operational reporting.
- Improved application performance through **Redis caching**, **database query optimization**, **API rate limiting**, and production monitoring using **AWS CloudWatch**, **Prometheus**, and **AppDynamics**, enhancing scalability, troubleshooting, and system reliability.
- Developed **high-volume CSV/Excel processing pipelines** for **PAN Master**, **URN Reverse Feed**, and operational reporting using **csvtojson**, **json2csv**, and **adm-zip**, while participating in the complete **SDLC** including **BRS/WBS**, technical design, security reviews, Agile development, testing, deployment, production support, **APIDoc**, **ESLint**, and **Husky**.

Web Developer Analyst, Accenture | Client: MERCK | Nov 2020 – May 2025

Project: Contributed to enterprise pharmaceutical applications by developing responsive React.js frontends and integrating Node.js-based backend services for desktop, iPad, and mobile platforms.

- Built **React.js** applications using **JavaScript (ES6+)**, **Hooks**, **Redux**, **Context API**, reusable components, custom hooks, and **Higher-Order Components (HOCs)**, while optimizing performance through **lazy loading**, **code splitting**, **memoization (useMemo/useCallback)**, **virtualization**, and bundle optimization to deliver scalable, maintainable, and high-performance user interfaces.
- Built **responsive cross-platform interfaces** for **desktop**, **iPad**, and **mobile** devices, ensuring consistent UI/UX across multiple screen sizes.
- Integrated **React.js** applications with secure **REST APIs** and developed backend services using **Node.js**, **Express.js**, **MongoDB**, and **JWT authentication** to support business workflows.
- Delivered **end-to-end full-stack features**, including **CRUD modules**, **Razorpay payment gateway integration**, secure session management, REST API development across React and Node.js applications.
- Created **dynamic enterprise templates** using **Veeva Vault** and **Pug (Jade)**, streamlining content management and business communication workflows.
- Collaborated with **cross-functional Agile teams** throughout requirement analysis, design discussions, code reviews, testing, deployment, and **production support**, ensuring high-quality software delivery.

Tech Associate, Sutherland Global Services | Jan 2018 – Apr 2020

- Provided **L2 production support** for enterprise applications by troubleshooting production incidents, resolving application issues, and ensuring high system availability within SLA timelines.
- Executed **PostgreSQL/SQL** queries for data validation, production data fixes, patch verification, and database updates to support smooth application operations.
- Investigated frontend and API issues through log analysis and root cause analysis (RCA), collaborating with development and database teams to implement timely resolutions.
- Supported **Salesforce CRM** operations, created technical documentation and support runbooks, and assisted business users to ensure a seamless customer experience.

EDUCATION

Master's in Information Technology – Mumbai University (2022-2024)

Bachelor's in Information Technology – Mumbai University (2013 – 2016)
